大爱元宇宙 (GreatLoveDAO) AI 智能体应用手册

大爱元宇宙是一个结合了 AI、DeFi、SocialFi 与 GameFi 的变革性 Web3 平台。自 2025 年 5 月上线以来，平台已积累超过 500 万钱包用户。目前，项目正处于从免费社区发展出一个以 **AI 智能体 (AI Agent)** 矩阵订阅为核心的 **AIGC** 生产力社区。

一、核心价值：前 **10 万名 AIGC** 生产力社区的财富先机

大爱元宇宙 AI 智能体不仅是网络节点，更是具备实际经济效益的数字生产力工具。为了加速 **AIGC** 生产力社区的建设，项目通过以下机制保障首批参与者的收益：

- 前 **10 万名**专属获利通道（先到先得）：
  - 首批 **10 万名**用户激活 AI 智能体将获得极其优厚的"创始红利"与"返现保护机制"。
  - **110 USDT** 的终身权益：前 10 万名用户仅需支付一次 110 USDT 订阅费即可永久免除未来月费，并锁定全球 AIGC 生产收益。
- **GLC** 奖励保障（**10 万亿储备池**）：
  - 无忧回本保障：若前 10 万名用户在激活后 **30** 天内 未能通过矩阵收益或直推奖金实现 100% 回本（即累计收益少于 110 USDT），系统将自动开启补偿。
  - 补偿标准：系统将从 10 万亿 GLC 奖励池中每日发放 **100 万 GLC** 作为奖励，直至用户通过现金流收益回本，或累计 GLC 补偿达到 **1 亿枚** 为止。
- **GLC** 价值底座 **(RWA)**：作为补偿发放的 GLC 是一个以真实世界资产 (RWA) 为基础的社区代币。其底层锚定价值 1 亿美元的稀世国宝——西夏缂丝佛幡，为 GLC 提供了真实的内在价值保障。
- 后期转型：当 **AIGC** 生产力社区达到 **10 万 AI** 智能体的矩阵规模后，USDT 返现与 GLC 补偿机制将停止，后续用户将转为每月约 10 USDT 且无返现的纯 SaaS 订阅模式。

二、什么是 **AI** 智能体？（**AI Agent** 核心能力）

大爱元宇宙 AI 智能体是部署在手机 **App** 上的 **Web3** "分布式数字员工"，具备强大的 **AIGC**（**AI** 生成内容）生产力。

- 自动化资产生产：智能体基于海量古董文物数据自动创作并铸造独特的 NFT 数字艺术品。
- 多维度内容生成：自动生成文化传承短视频、健康养生图文及生活方式类的高质量内容并发布至社交网络。
- 智能变现逻辑：
  - 自动交易：智能体在网络中自动挂单交易生成的 NFT。
  - 收益分成：通过 AIGC 生产网络产生的收益，按照 **30%** 平台留存、**70%** 智能体持有者分成 的比例实时分配。
  - 流量收益：利用生成的视频内容吸引全球流量，获取广告分红和版权收入。

三、个人投入策略：最大化收益模型

大爱元宇宙 **App** 为每个用户自动生成 1 主 30 子共 31 个钱包。通过加单激活，每个 **App** 用户最高可激活 **31** 个 **AI** 智能体。每个智能体的 10 层矩阵满员后，奖励额最高为 **5,120 USDT** (1024 $\times$ 5 = 5,120)。

1. 普通激活法

- 起步：投入 110 USDT 激活主钱包 AI 智能体。
- 进阶：每当账户奖励额累计达到 110 USDT 后，利用该利润激活名下一个子钱包。
- 目标：逐步铺满 31 个席位，实现单一账户收益最大化。

2. 高速激活法

- 起步：支付 110 USDT 激活主钱包，并立即激活名下前 2 个子钱包（额外支付 220 USDT）。
- 即时回流：主钱包作为推荐人将立即获得 **100 USDT** 直推奖金 (50 \times 2 = 100)。
- 优势：三席驱动，获取矩阵滑落奖励与生产收益的速度显著提升。
- 目标：逐步铺满 31 个席位，实现单一账户收益最大化。

四、网红与 **KOL** 的爆发式变现

1. 自动化绑定：KOL 激活后分享包含个人邀请码的 App 下载链接。粉丝下载后，系统自动锁定 KOL 为其介绍人。
2. 高额直推奖：粉丝激活智能体，KOL 立即赚取 **50 USDT/**人 的直推奖，且无人数上限。
3. 收益示例：1000 名粉丝激活 = **50,000 USDT** 直推奖励，外加其落位带来的持续矩阵管理收益。

五、关键操作说明

- 支持代客加单：支持现有会员为他人代付激活费。系统判定支付者为介绍人，新用户可线下向介绍人结算激活费。
- 链上结算：基于 Polygon 链，数据透明不可篡改，奖励额提取秒级到账，0 手续费。

GreatLoveDAO AI Agent Application Manual

GreatLoveDAO is a transformative Web3 platform combining AI, DeFi, SocialFi, and GameFi. Since its launch in May 2025, it has amassed over 5 million wallet users. Currently, **the project is evolving from a free community into an AIGC productivity community centered on AI Agent matrix subscriptions.**

I. Core Value: Wealth Opportunity for the First 100k AIGC Productivity Community Members

GreatLoveDAO AI Agents are not just network nodes; they are digital productivity tools with actual economic benefits. To accelerate the **construction of the AIGC productivity community**, the project ensures the following benefits for early participants:
- **Exclusive Profit Channel for First 100k (First Come, First Served)**:
  - The **first 100,000 users** to activate AI Agents will receive generous "Founding Bonuses" and a "Cashback Protection Mechanism".
  - **110 USDT Lifetime Rights**: The first 100,000 users only pay a one-time subscription fee of 110 USDT to permanently waive future monthly fees and lock in global AIGC production earnings.
- **GLC Reward Guarantee (10 Trillion Pool)**:
  - **Risk-Free ROI Guarantee**: If the first 100,000 users do not achieve a 100% ROI through matrix or referral rewards within **30 days** of activation (earnings less than 110 USDT), the system will automatically trigger compensation.
  - **Compensation Standard**: The system will distribute **1 million GLC** daily from the 10 trillion GLC reward pool until the user breaks even or total compensation reaches **100 million GLC**.
- **GLC Value Foundation (RWA)**: As the basis for compensation, GLC is a community token built on Real World Assets (RWA). It is anchored by a rare national treasure, the Western Xia Kesi Buddhist Banner valued at $100 million, providing GLC with solid intrinsic value backing.
- **Future Transition**: Once the **AIGC productivity community reaches a matrix of 100,000 AI Agents**, USDT dividends and GLC compensation will stop, and subsequent users will move to a pure SaaS subscription model of approximately 10 USDT per month.

II. What is an AI Agent? (Core AIGC Capabilities)

GreatLoveDAO AI Agents are **Web3 "Distributed Digital Employees"** deployed on a **mobile App**, equipped with powerful **AIGC (AI Generated Content)** productivity.
- **Auto-Asset Production**: Automatically creates and mints unique NFT digital artworks based on massive library of antique data.
- **Multi-dimensional Content Generation**: Automatically produces high-quality content such as cultural heritage short videos and health/lifestyle posts to be published on social networks.
- **Smart Monetization Logic**:
  - **Auto-Trading**: Automatically lists and trades minted NFTs within the network to

capture market value.

- ○ **Revenue Distribution**: Earnings generated through the AIGC network are distributed in real-time at a ratio of **30% for the platform and 70% for the Agent holder**.
- ○ **Traffic Earnings**: Uses generated video content to attract global traffic, earning advertising dividends and copyright income.

III. Personal Investment Strategies: Maximizing Revenue

The GreatLoveDAO App automatically generates 1 main and 30 sub-wallets (31 total) for every user. Through additional activations, **every App user can activate up to 31 AI Agents**. Once a single Agent's 10-layer matrix is full, the **reward amount** reaches up to **5,120 USDT** (1024 \times 5 = 5,120).

1. Standard Activation Method

- **Starting**: Invest 110 USDT to activate the main wallet AI Agent.
- **Advancing**: Every time the **reward amount** reaches 110 USDT, use that profit to activate the next sub-wallet.
- **Goal**: Gradually fill all 31 seats to maximize revenue for a single account.

2. High-Speed Activation Method

- **Starting**: Pay 110 USDT for the main wallet and immediately activate the first 2 sub-wallets (totaling 330 USDT).
- **Instant Return**: The main wallet, acting as the referrer, immediately earns **100 USDT** in direct rewards (50 \times 2 = 100).
- **Advantage**: "**Triple-Seat Drive**" significantly increases the speed of acquiring matrix spillover and production rewards.
- **Goal**: Gradually fill all 31 seats to maximize revenue for a single account.

IV. Explosive Monetization for Influencers and KOLs

1. **Automatic Binding**: KOLs share an App download link containing their personal invite code. Once fans download, the system automatically locks that KOL as the Introducer.
2. **High Direct Rewards**: When fans activate an Agent, the KOL earns **50 USDT** per person instantly, with no cap on the number of people.
3. **Revenue Example**: 1,000 fan activations = **50,000 USDT** in direct rewards, plus ongoing matrix management revenue from their placement.

V. Key Operational Details

- **Proxy Payment Support**: **Existing members** are supported in paying activation fees for others. The system designates the payer as the Introducer, and new users can settle the **activation fee with the Introducer offline**.
- **On-Chain Settlement**: Based on the Polygon chain, with transparent and immutable data. **Reward amounts** are withdrawn in seconds with 0 fees.
